

4.1.1 Insert Relative, Absolute and Mixed References

Now that you've completed this lecture, you should be able to create formulas that use absolute and relative references.

Try the techniques on your own using the following steps

1. Open the workbook named 411 provided as a resource with this TIY. Add a new column to the right of the table named Revenue and make its heading **Extra Revenue 2023**.
2. Create an appropriate formula in cell H4 that calculates the amount of additional revenue that will be received based on the % growth figure shown in cell J2. Ensure that the correct formula has been AutoFilled to cells H5 to H11.
3. In the Profit Forecast worksheet, create a formula in cell H4 that multiplies the amount in cell G4 by the value of the Growth named range.
