

## 4.2.3 Perform Conditional Operations by using the IF Function

Now that you've completed this lecture, you should be able to create formulas that use the IF function.

**Try the techniques on your own using the following steps**

1. Open the workbook named 423 provided as a resource with this TIY. In the Marketing Plan Budget worksheet, in cell I4, create a formula which checks whether the value of the Total exceeds €500,000. If it does, then you should display the word "Caution", otherwise the cell should remain blank. Ensure that the formula works for all categories of expenditure.
