

1.4.6 Display Formulas

Now that you've completed this lecture, you should be able to display formulas in your workbooks.

Try the techniques on your own using the following steps

1. Open the workbook named 148 provided as a resource with this TIY. Display on screen ONLY the formula in cell E11.
2. Show all formulas in the worksheet.
3. Modify the options for the workbook to display formulas in cells rather than their calculated results.
