

1.2.1 & 1.2.2 Search & Navigate to Named Cells, Ranges, or Workbook Elements

Now that you've completed this lecture, you should be able to search for data within workbooks, and to navigate to named cells, named ranges or other workbook elements.

Try the techniques on your own using the following steps

1. Open the workbook named 1212 provided as a resource with this TIY. Find all occurrences of the word "aircraft" in the "Maintenance Schedule" worksheet.
2. Replace all occurrences of the word "advertising" with the "marketing" in the entire workbook.
3. Find the word "HIRE" matched by case.
4. Find the text "car hire margin" anywhere in the workbook but ensure that you match the entire cell contents.
5. Find the comment "Dave's comment" in the workbook and change it to "My comment".
6. Find the one cell in the workbook which has data validation applied.
