4.1.2 Reference Named Ranges and Named Tables in Formulas

Now that you've completed this lecture, you should be able to create formulas which reference named ranges and tables.

Try the techniques on your own using the following steps

1. Open the workbook named 412 provided as a resource with this TIY. In cell B11 of the Marketing Plan Budget worksheet, create a formula which calculates the average expenditure in the Expenditure table for 2017. Make sure the formula refers to the table name. AutoFill for the other years.

2. In cell I10 create a formula that calculates the total expenditure for the StaffHires named range.
